

Kid's Country Barn Water Safety Plan

When children are on the playground and in the classrooms, we ensure they do not go near any water sources by following these procedures at our facility:

1. We have alarms and bells on the doors in the classrooms to alert us when children are entering and exiting.
2. We have latches on the gates on the playgrounds. DCYF inspects our fences, makes sure they are in good condition, and are at the required height.
3. When crossing over the bridge across the creek, we have a teacher in the lead and one following the children. If the creek is too high, we go another direction.
4. When we take the children on a field trip near a body of water, we have the children hold onto a rope, hold hands or have one teacher in the lead and one behind.
5. We keep a list of the children present with us at all times.
